

High pressure valves

Introduction

The Habonim high pressure valve series is based on a floating ball valve technology, specially built for endurance and reliability with a design pressure of up to ANSI Class 2500 (414 bar / 6000 psi). As standard, the high pressure series is made from forged or rolled bar material. Consequently we are able to 'sculpture' the valve to customer specific demands in a very short time. The result is a cost effective solution compared with trunnion mounted ball valve technology. The high pressure valve series delivers reliable performance in the most demanding applications in the oil & gas, offshore drilling platform, petrochemical and the power industries.

The 28 series with size up to and including 2" (DN50) is capable of operation under full Class 2500 differential pressure, providing smooth and trouble free functionality. For sizes 2½" (DN65) and above the 28 series with hybrid seats can handle differential pressure of up to 255 bar (3700 psi).

The pressure containing parts are in compliance with ASME B16.34, for wall thickness, the design successfully passed burst testing according to DNV rules, i.e. holding four times the pressure rating for 5 minutes. A one-size-up stem made of high tensile material complies with ASME B16.34 and API 6D for drive train requirements provides sufficient safety factor during operation. A special hybrid seat design is comprised of a metal housing and polymer insert machined as a single unit. This provides higher metal seat stiffness and bubble tight shut-off (Rate A) combined with lower operating torque compared to any equivalent valve solution.

The 27 series is a cost effective solution compared with the 28 series, The 27 series with size up to and including 2" (DN50) is capable of operation under full Class 2500 differential pressure, providing smooth and trouble free functionality.

For sizes 2½" (DN65) and above the 27 series can handle differential pressure of up to 70 bar (1015 psi).

The 24 series is part of the Habonim high pressure instrumentation line, a two-piece design, in sizes up to 1½" (DN40). The 24 series are designed for shutoff against full differential pressure of 414 bar (6000 psi).

The 24 series is DNV certified, having successfully passed burst testing as well as fire safe testing to API 607 and ISO 10497. By default the valve is manually operated, automation is available upon request.

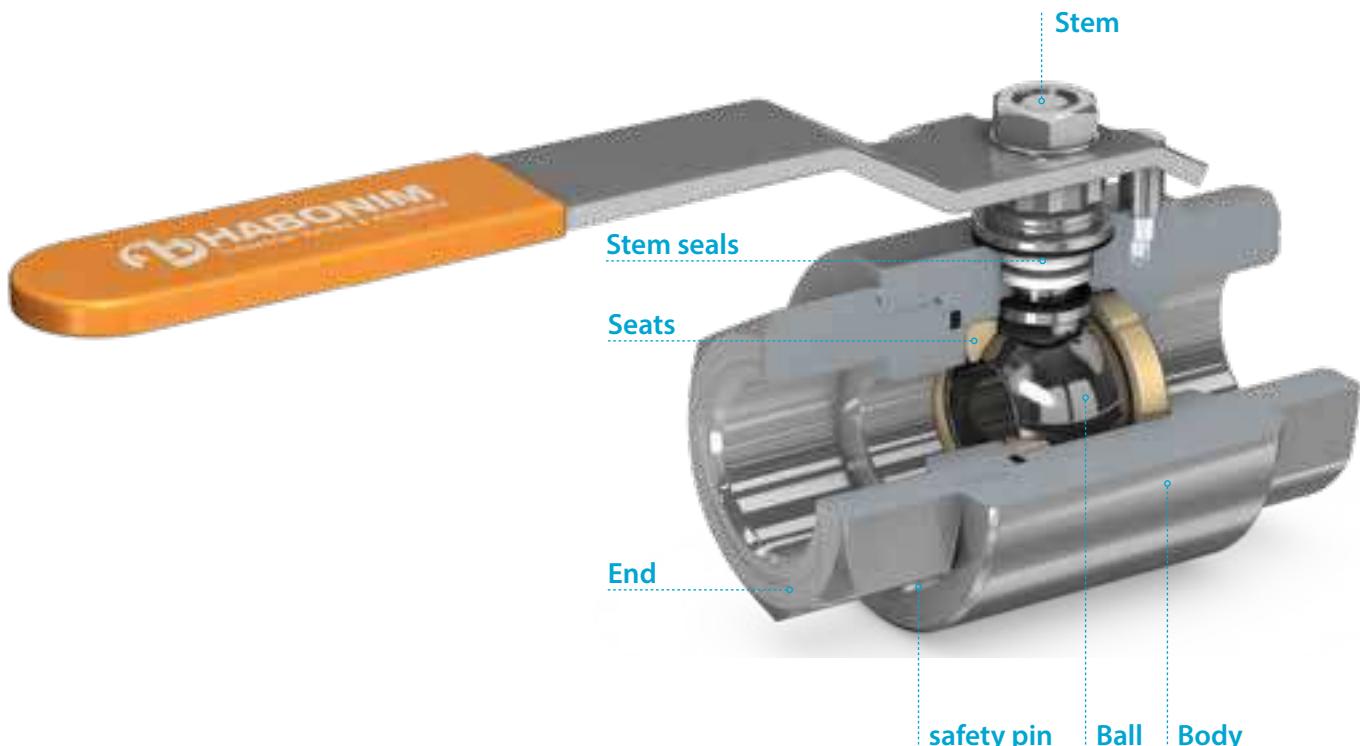

Technical summary

Size range	1/4"-8" (DN8-DN200)
Series in range	28 series ANSI B16.34 class 2500 (wall thickness), size 1/4"-8" (DN8-DN200) 27 series ANSI B16.34 class 2500 (wall thickness), size 1/4"-2" (DN8-DN50) ANSI B16.34 class 1500 (wall thickness), size 2½"-8" (DN65-DN200) 24 series Class 2500, size 1/4"-1½" (DN8-DN40)
Temperature range	-60 °C to +260 °C (-76 °F to +500 °F)
Materials	Stainless Steel 316/316L, Carbon Steel ASTM A350 LF2, C.St A105 and more.
End connections	Threaded, welded, flanged

Standards of compliance

Factory certification	ISO 9001:2015	Quality management system

24 Series design features

Body

- Two piece design - minimum leak paths
- Threaded body - end connection
- Robust high pressure design
- Full compliance with B16.34 and API 6D
- Carbon steel valves are oxidized to MIL-DTL-13924 standard or available in epoxy paint finish upon request
- Stainless steel and high alloy valves provided with natural finish
- Safety pin eliminates unintentional rotation of end connection

Ball

- Mirror polished
- Solid ball
- Pressure equalizing hole in the stem slot
- 17-4PH high tensile ball for 1/4"-3/4" DN8-DN20 valves (standard)

Stem

- One pcs solid stem
- 17-4PH high tensile valve stem (standard)
- Anti blowout proof design
- Anti-static device
- Fire-lip

Stem seal

- ISO 15848-1 certified
- High endurance up to hundreds of thousands of cycles
- Non-graphite fire safe certified stem seal
- Anti-abrasion mechanism
- Live loaded

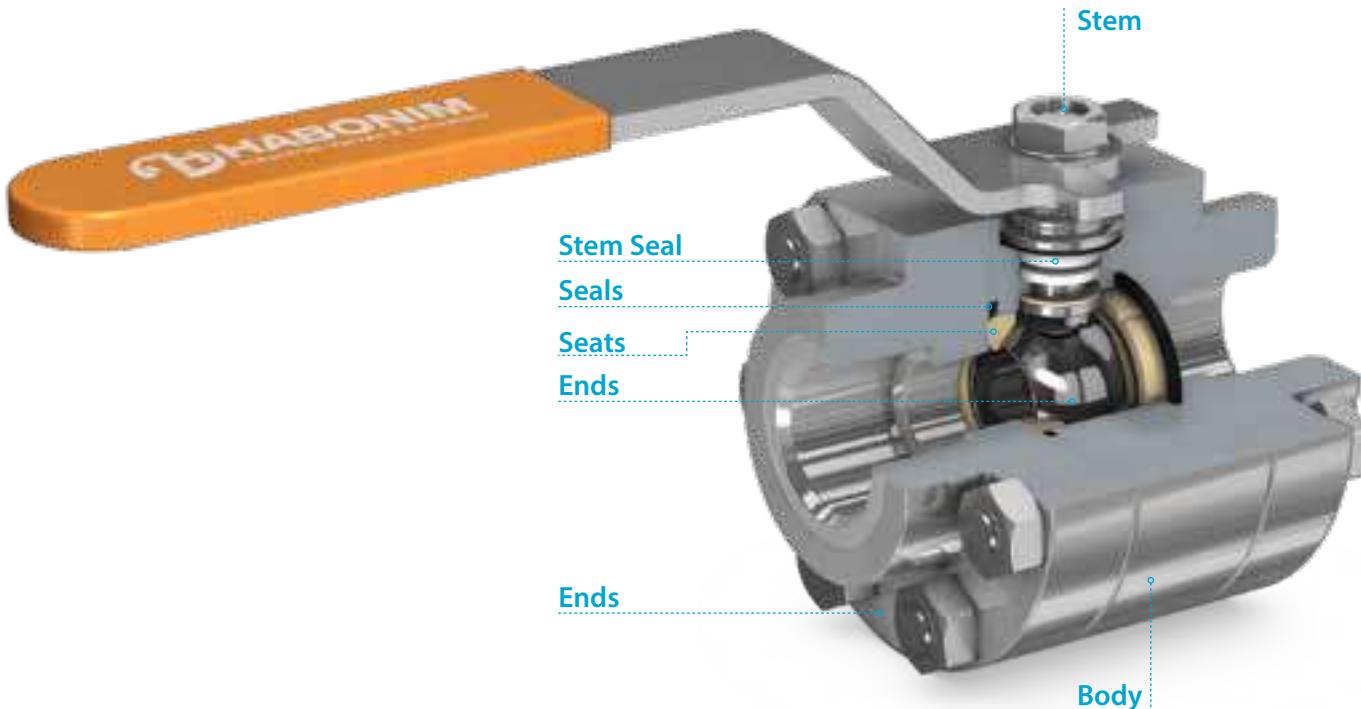

Seats and seals

- Adapted for high pressure seats
- Shore 90 hardness O-ring seals
- Rate A leakage tightness
- Variety of materials

Operation

- The 24 series are designed for shutoff against full differential pressure of 414 bar (6000 psi)
- Automation is available upon request

27 Series design features

Body

- Three-piece in-line design for easy repair
- Various types of end connections available
- Robust high pressure design
- Wall thickness compliant with B16.34
- Carbon steel valves are oxidized to MIL-DTL-13924 standard or available in epoxy paint finish upon request
- Stainless steel and high alloy valves provided with natural finish

Ball

- Mirror polished
- Solid ball
- Pressure equalizing hole in the stem slot
- 17-4PH high tensile ball for 1/4"-3/4" (DN8-DN20) valves (standard)

Stem

- One piece solid stem
- 17-4PH high tensile valve stem (standard)
- Anti blowout proof design
- Anti-static device
- Fire-lip

Stem seal

- ISO 15848-1 certified
- High endurance up to hundreds of thousands of cycles
- Non-graphite firesafe certified stem seal
- Anti-abrasion mechanism
- Live loaded

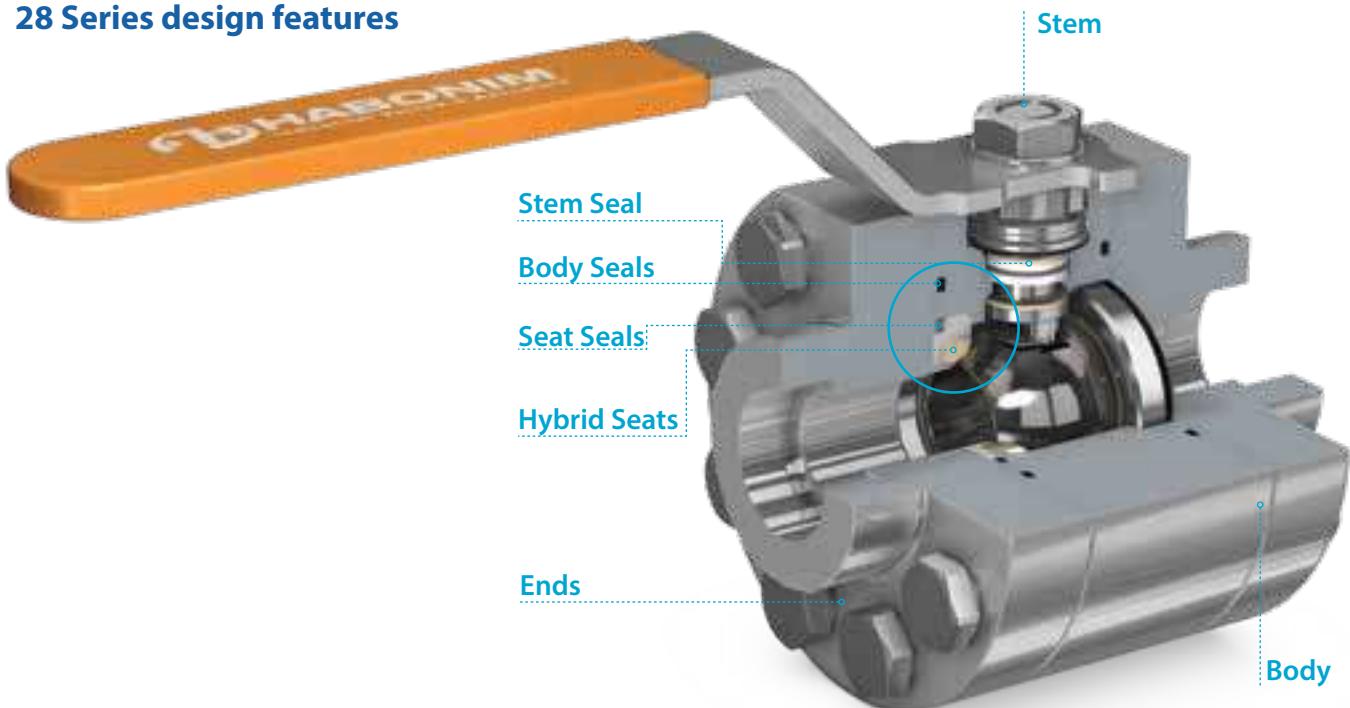

Seats and seals

- Adapted for high pressure seats
- Shore 90 hardness O-ring seals
- Rate A leakage tightness
- Variety of materials

Operation

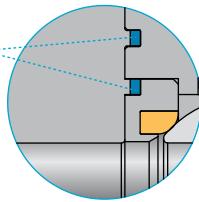

- The 27 series, Size 1/4"-2" (DN8-DN50) is designed for breakout to open under maximum differential pressure of class 2500
- Size 2 1/2"-8" (DN65-DN200) is designed for breakout to open under maximum differential pressure of 70 bar (1015 psi)

28 Series design features

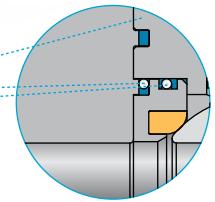

Standard design

Two seals of the same material: PTFE, graphite, NBR, Viton
Valve code example:
10 F28W-666MWG/NPT
G - for two graphite seals

Optional design

One body seal: PTFE, graphite, NBR, Viton
Two O-ring seat seals: NBR Viton
Valve code example:
10 F28W-666MWG/NPT-UV
G - for graphite body seal
UB or UV suffix to the ordering code for
NBR or Viton seat seals

Body

- Three-piece in-line design for easy repair
- Various types of end connections available
- ISO 5211 pad for standard instrumentation attachment
- Robust high pressure design
- Full compliance with B16.34 and API 6D for class #1500 (including bolts), wall thickness compliant for #2500
- Carbon steel valves are oxidized to MIL-DTL-13924 standard or available in epoxy paint finish upon request
- Stainless steel and high alloy valves provided with natural finish

Ball

- Mirror polished
- Solid ball
- Pressure equalizing hole in the stem slot
- 17-4PH high tensile ball for 1/4"-3/4" (DN8-DN20) valves (standard)

Stem

- One-piece solid oversized stem to accommodate high torques
- 17-4PH high tensile valve stem (standard)
- Blowout-proof design
- Anti-static device
- Fire-lip

Stem seal

- ISO 15848-1 certified
- High endurance up to hundreds of thousands of cycles
- Non-graphite firesafe certified stem seal
- Anti-abrasion mechanism
- Live loaded

Seats and seals

- Hybrid seats for high pressure durability
- Double sealed body
- Shore 90 hardness for O-ring seals
- Optional second O-ring seal
- Rate "A" leakage tightness
- Variety of high rigidity polymers for insert materials

Operation

- The 28 series, Size 1/4"-2" (DN8-DN50) is designed for breakout to open under maximum differential pressure of class 2500
- Size 2 1/2"-8" (DN65-DN200) is designed for breakout to open under maximum differential pressure of class 1500.

Features

A ⁽³⁾	Anti-Static
F	Fire safe
B	Full port
H ⁽³⁾	High pressure
R	Flush tank
O	Clean assembly for O ₂ service
I	High purity Class 10000 assembly room
M	Ammonia service
K	Chlorine service
V	Vacuum service
Series	
24	Instrumentation valve #2500 up to 2" size
27	Three pieces valve #1500 / #2500
28	Three pieces valve with hybrid seats #2500
Design	
	Basic design ⁽¹⁾
X	HermetiX™ stem seal
W	HermetiX™ graphite-free fire safe stem seal

The 28 Series Hybrid seats code system

14	23	24	25	25
Hybrid Seat	Insert material	Upstream / Downstream	Insert Shape	Housing Shape + Seal Type
F	C PCTFE	0	0	U + Viton
	K CF PEEK			U + NBR
	L Virgin PEEK	1	1	L + Graphite
	S VESPEL			L + PTFE
	Y Delrin	5	5	
	W PVDF			

Hybrid Seat Types

Insert Shapes

The "L shape" is mainly used for fire-safe or cryogenic applications where an elastomer O-ring cannot be used. The "U shape" housing allows for the use of O-ring elastomers for general purpose applications.
